R Markdown

This is an R Markdown document. Markdown is a simple formatting syntax for authoring HTML, PDF, and MS Word documents. For more details on using R Markdown see http://rmarkdown.rstudio.com.

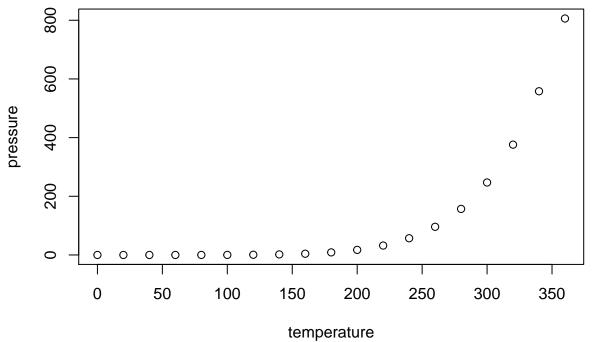

When you click the **Knit** button a document will be generated that includes both content as well as the output of any embedded R code chunks within the document. You can embed an R code chunk like this:

summary(cars)

```
##
        speed
                         dist
                              2.00
##
           : 4.0
                    Min.
                            :
    Min.
                    1st Qu.: 26.00
##
    1st Qu.:12.0
##
    Median:15.0
                    Median: 36.00
##
    Mean
           :15.4
                    Mean
                            : 42.98
    3rd Qu.:19.0
                    3rd Qu.: 56.00
##
            :25.0
                            :120.00
    Max.
                    Max.
```

Including Plots

You can also embed plots, for example:

Note that the $\mbox{echo} = \mbox{FALSE}$ parameter was added to the code chunk to prevent printing of the R code that generated the

Fooling around

BOLD TITLE

 $italic\ title$

two spaces after list objects to create it

- -list
- -of
- -things
- -Use CMD+OPT+I to create a code stuff, must be created with $\{\mathtt{r}\}$ in order to work
- -CMND+SHIFT+ENTER to run a code chunk

```
print('HelloMF!')
```

[1] "HelloMF!"
